	(g) "Skladev" (Depots).				
2.	There was a "Tsentralnoye Artelleriskoye Konstruktorskoye Bureau" (Central Artillery Construction, or Design, Bureau). Its main activity consisted of furnishing guidance to KBs (design bureaux) in military factories.				
8.	The head of the Chief Artillery Directorate prior to World War II was Marshal Kulik. At present /1954 this post is held by Chief Marshal of Artillery Voreney. If it is not Voronov, then t is Marshal Th istiakov.	The second of th	25X1 25X1		
4.	The Chief Artillery Directorate was in charge of artillery and of all weapons capable of being fired (except perhaps for those weapons utilized in tanks and aircraft) and of providing amountion (except for that used in aircraft weapons). The Directorate also had the responsibility of storing artillery and other weapons, inspecting, repairing, and providing all weapons, and training artillery personnel.		20/(1		
i.	The Artillery Technical Committee was concerned with research and development. New destrines were developed at the Military Artillery Academy and by the Military Academy of Artillery Sciences. The latter was established only after World War II.
